## ABOUT US

Islahiya Public School located in Puthur is run by Islahiya Charitable Trust. In Islahiya classes are functioning from KG to Secondary level. School follows the curriculum of Central Board of Secondary Education (CBSE). The school is having best academic and infrastructure to compete with any such schools in the locality. The school values how children learn during the different stages of their life as well as addresses the needs of different learners. In addition to the modern education, the school provides training in moral studies and work experience to the students.

We specialize in providing an academic environment that supports every child's learning and nurturing needs. Our educational goal is to engage your child's natural curiosity and creativity and develop these qualities in a holistic manner, so as to instill a lifelong love for learning.

Our school's all new infrastructure, located in a serene and pollution-free surrounding has been specifically designed to create a cozy and secure environment for your child. Plenty of outdoors, spacious and colourful classrooms, large play area with modern play equipment, effective teacher-student ratio, friendly and caring teachers, carefully chosen set of extra-curricular activities such as Arts, Sports, Scouts, Red cross, and so on. and above all a well established curriculum create the perfect blend of contextual settings that elicit the best out of your child.

# CURRICULUM

## Primary school

### Classes I - V

Subjects taught at the primary school level include English, Mathematics, EVS, Arabic, Malayalam, GK and Moral Science. All languages are taught with a balanced emphasis on both the written as well as the spoken aspects.

The school activities include the use of audio-visual aids, art, craft work, map work, experiments, field trips, projects and group discussions. These activities are followed by extensive written work. All students have practical lessons on the computer. The aim is to ensure that by the time the child graduates from the primary section, they will have a working knowledge of word processing, multimedia and simple graphics. All exercises on the computer are correlated with the lessons taught in class in order to enhance the children's understanding of the various subjects.

## Homework and Tuition

It is the policy of the School that all work should be completed in school at the primary level. Students who need extra tutorials are coached free of cost. After school hours, all children are encouraged to spend their free time reading and improving their language skills.

## Assessment

No formal tests are conducted for the lower primary section. After every topic a review is done, and the performance of the student is noted. The aim is to ensure that the students have understood the course work and do not resort to rote learning. Thus, the students are continuously assessed and all subject teachers give a detailed report at the end of every term. The class teacher, teacher in-charge junior section and the principal continuously monitor each child's performance.

## **Junior school**

### **Classes VI , VII & VIII**

Subjects taught at the middle school level include English, Mathematics, Physics, Chemistry, Biology, History & Civics, Geography, Moral Science, General Knowledge, Computer Science, one second language and one third language. Apart from the theory covered in the computer science portions, students are given extensive practical training. This includes a more rigorous understanding of spreadsheets, database management, graphics, internet and basic programming. Several projects are also assigned by subject teachers, which have to be completed using the computer.

## **Homework and Tuition**

At the middle school level, homework is assigned on a daily basis. However, it is targeted and there is a specific timetable to ensure that the child is not over burdened. All students are given projects in addition to the regular class work to enhance their understanding of various subjects. Exceptionally bright students are enrolled in an accelerated program, which is conducted on Sundays and during holidays

## **Assessment**

Formal test are conducted at the end of every term and a detailed report is prepared. The class teacher and the principal continuously monitor each child's performance.

## CO CURRICULAR

### ARTS, CRAFTS AND CLUBS:

The School believes strongly in the all-round development of the child. Thus physical, intellectual, aesthetic and spiritual growth are harmonised. We have a group of well-qualified and experienced teachers in Arts and Drawing.

### OTHER CLUB

Students are also offered the choice of participating in various clubs guided by the staff. Among the clubs offered at present Science, Mathematics, Social, IT, languages and Islamics

## SPORTS

Islahiya offers its students a chance to learn and excel in a wide variety of sporting related activities. These include athletics, football, cricket and badminton. The junior students (up to the 5th standard) are taught all the various disciplines. Students above the 6th standard are required to choose one main sport in which they concentrate on, all year round. We believe that this would help in fostering excellence in the chosen field. Seniors are also given a chance to participate in other sports if they choose to do so.

## HORSE RIDING

Islahiya School offers horse riding training for the students of middle school. To the casual observer it may look like all the rider has to do is just sit there. The horse does all the work, well anyone who has ridden a horse will know how wrong that is. There is far more to riding a horse than one might expect.

## SWIMMING CLASS

We are giving swimming class from the campus. We all know that Swimming is a healthy, low-cost activity that you can continue throughout your life.

## OUR FACILITIES

### Well equipped Composite Science Lab

The school also has a composite science lab which caters to the students of primary and middle school where they unravel and explore the world of science. At the primary level students are familiarized with the apparatus, equipments and specimens along with demonstrations of various experiments by teachers to develop an understanding and interest towards the subject. At high school level students are given opportunities to experiment together, make observations and arrive at conclusions which enable them to co-operate and work as a team, a skill that is indispensable in today's world.

### English Language Lab

To enhance English language skills right from the primary level in schools we have introduced English Language Labs, catering to the much needed requirement of sharpening Spoken English Language Skills. The Lab caters to language enrichment requirements of students from class I to class XII. The lab software enriches the Vocabulary, Pronunciation, Sentence formation (functional grammar) and Listening; comprehension skills.

### Computer Lab

The Computer Classroom supports hands-on instruction and allows students the opportunity to engage in participatory learning with technology. The computer classroom includes an instructor station and 50 student computers.

### Mathematical Lab

The Mathematical lab is based on the three pillars of imagination, investigation and interaction. It offers Multiple Teaching and Learning Aids as well as a complete theme based ambience which helps students to visualize and feel mathematics. It is a place where students can learn and explore mathematical concepts and verify mathematical facts and theorems through a variety of activities using different materials. These activities may be carried out by the teacher or the student to explore, to learn, to stimulate interest and develop favorable.

## Other Features:

- Library.
- CD Library.
- Counseling facility for the students.
- Well trained and Experienced Teachers.
- Smart class rooms.
- Audio-Visual rooms.
- Activity rooms.
- Activity based learning.

Build the right physical and social  
infrastructure that can deliver an excellent  
curriculum to realize our Vision
